MPS would like to say a huge THANK YOU to Doug Bracewell who has been teaching our classes Rippa Rugby over the last few weeks. We are super grateful for his time and efforts!

Gastro (tummy bugs)

What to do next:

1 Home:

to rest and have small amounts of water often; stay home for 2 days after vomiting or diarrhoea has finished

2 Family doctor:

if still sick on day 3 of symptoms

Gastro (tummy bugs)

Gastroenteritis is a bowel infection that causes diarrhoea (runny poos), stomach pain and vomiting. Some children will also have a headache or mild fever with gastro. Most children with gastro have mild symptoms that do not need to be treated by a doctor.

What to do

- Get your child to drink small amounts regularly (1/4 cup of water every 20 minutes).
- Plain water is best or watered down apple juice.
- Avoid sugary drinks which can make gastro worse.
- Get your child to have plenty of rest.
- Get children to wash hands thoroughly with soapy water after toileting and vomiting.
- Clean bathroom areas often.
- Check your child is going to the toilet to urinate (wee) at least every 6 hours.
- Wash hands thoroughly before food preparation.
- Do not share drink or food with the child that's sick.
- Stay home for 2 days after vomiting and/or diarrhoea has finished.

When to get help

Gastro can take a couple of days to go away. Call your family doctor if:

- your child is still sick after 2 full days of being sick
 - the volume and frequency of vomit or diarrhoea is increasing rather than decreasing
 - your child has tummy pains despite having pain relief.
- Take your child to ED if:**
- they are sleepy, floppy or limp, pale and sweaty
 - they have not urinated for 6 hours during the day
 - they have severe stomach pain
 - they have blood in their diarrhoea or vomit.
